

## Step to Start Eagle Software

File > New > Schematic

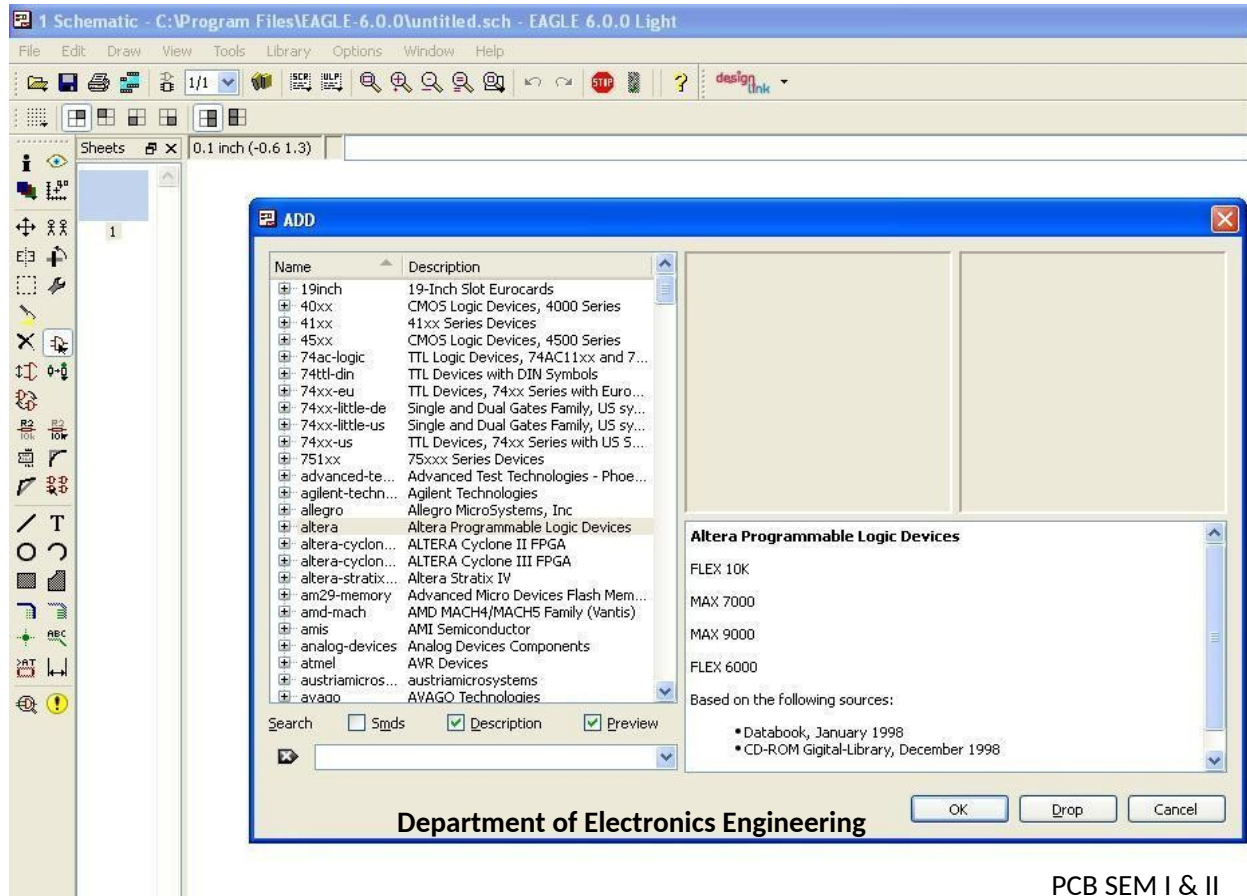

## Schematic View

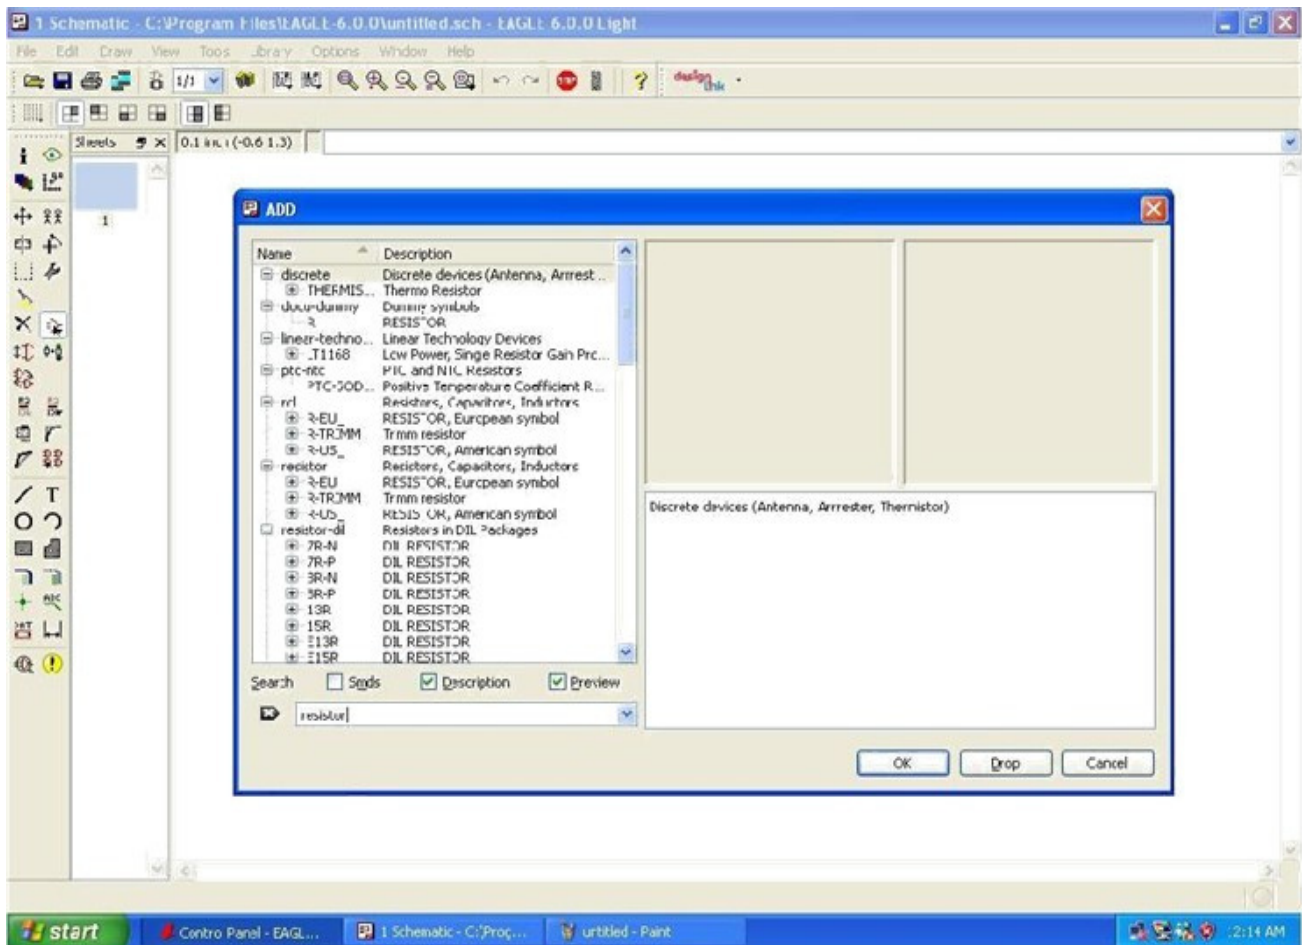

Step to Add Component

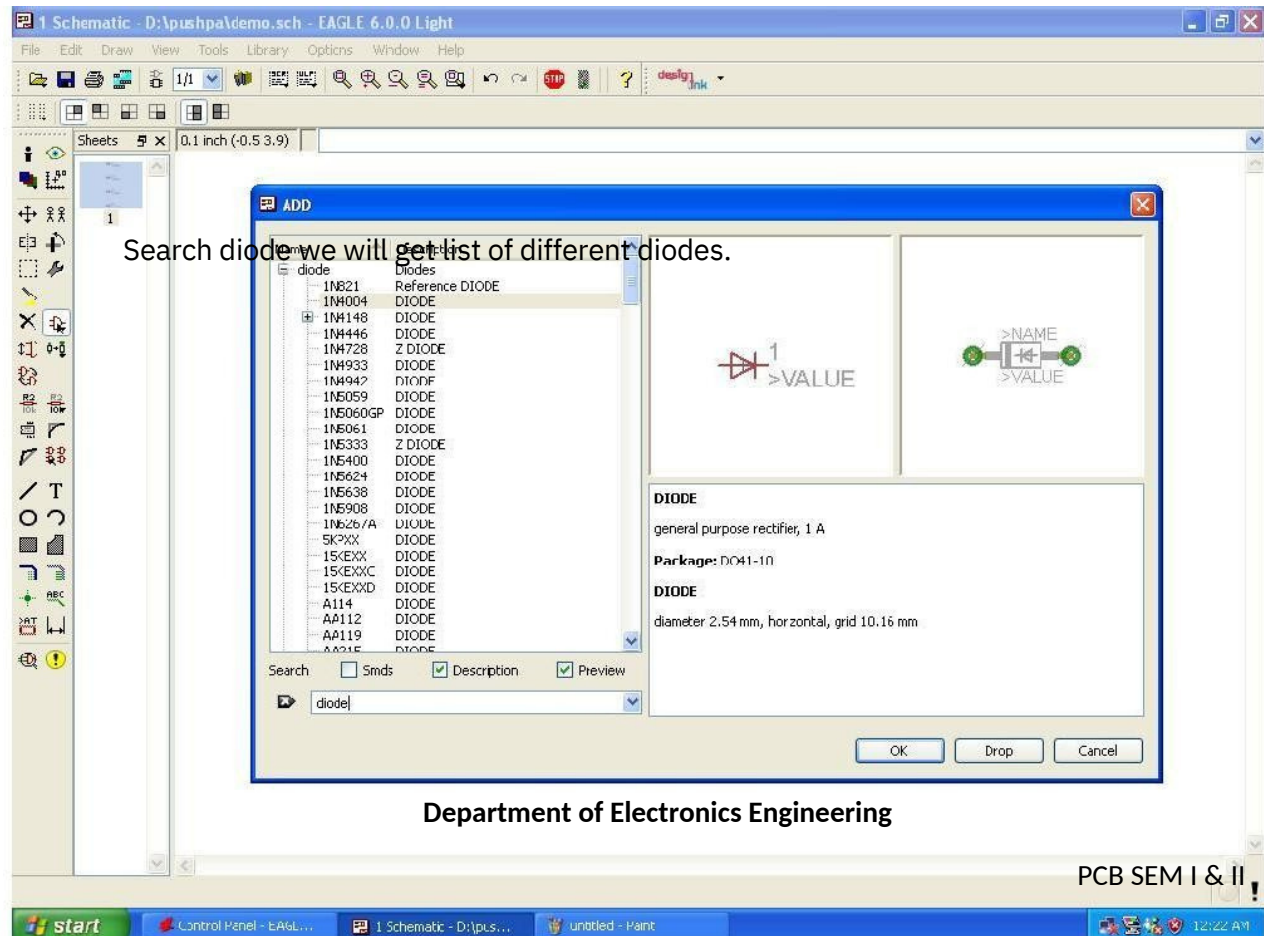

Click Addicon

Step to Search Specific Component from list

Type diode or Resistor or Capacitor etc in Search box

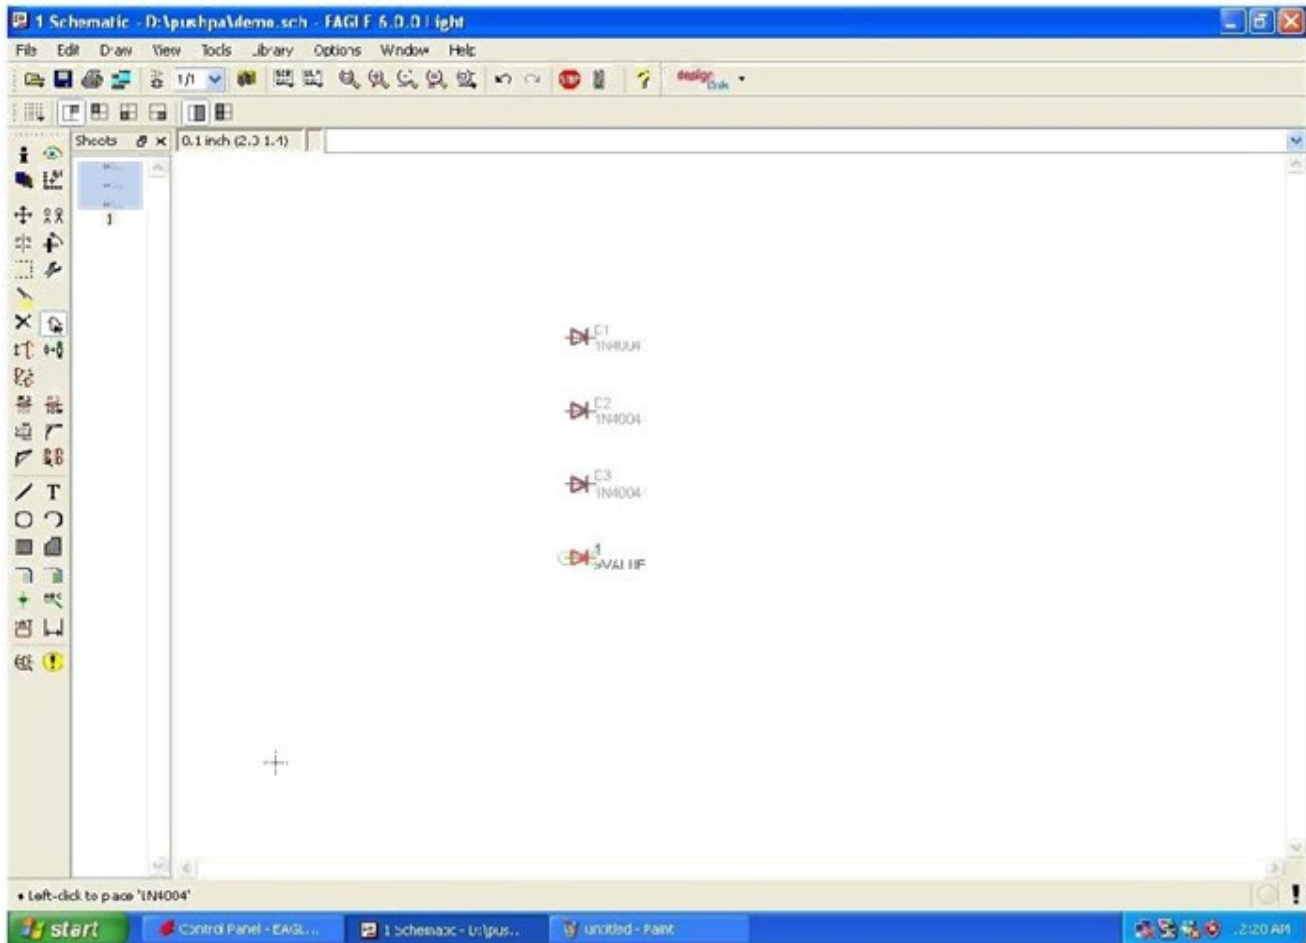

Add diode of Particular type by pressing Ok show in above diagram.

(A Constituent College of Somaiya Vidyavihar University)  
**Department of Electronics Engineering**

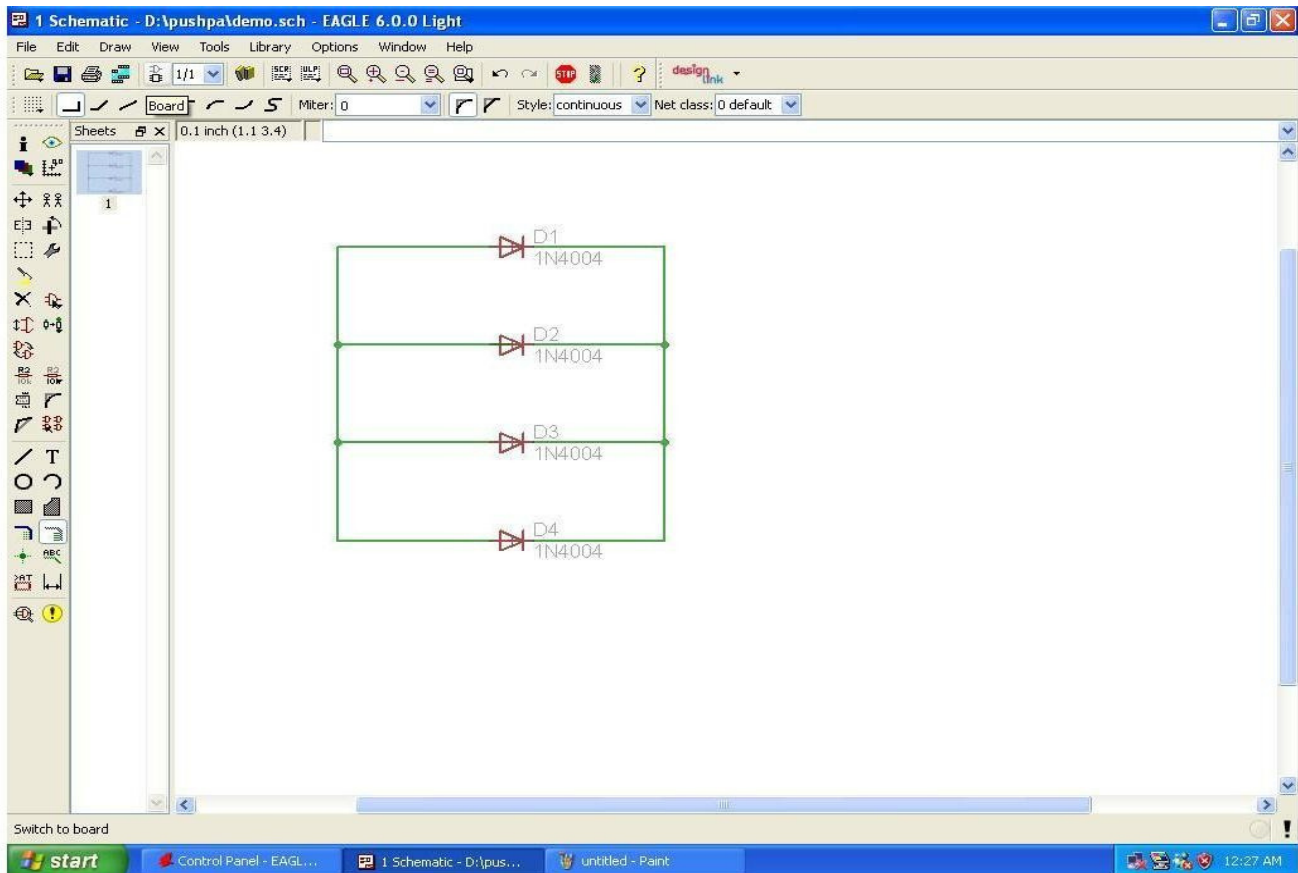

Department of Electronics Engineering

PCB SEM I & II

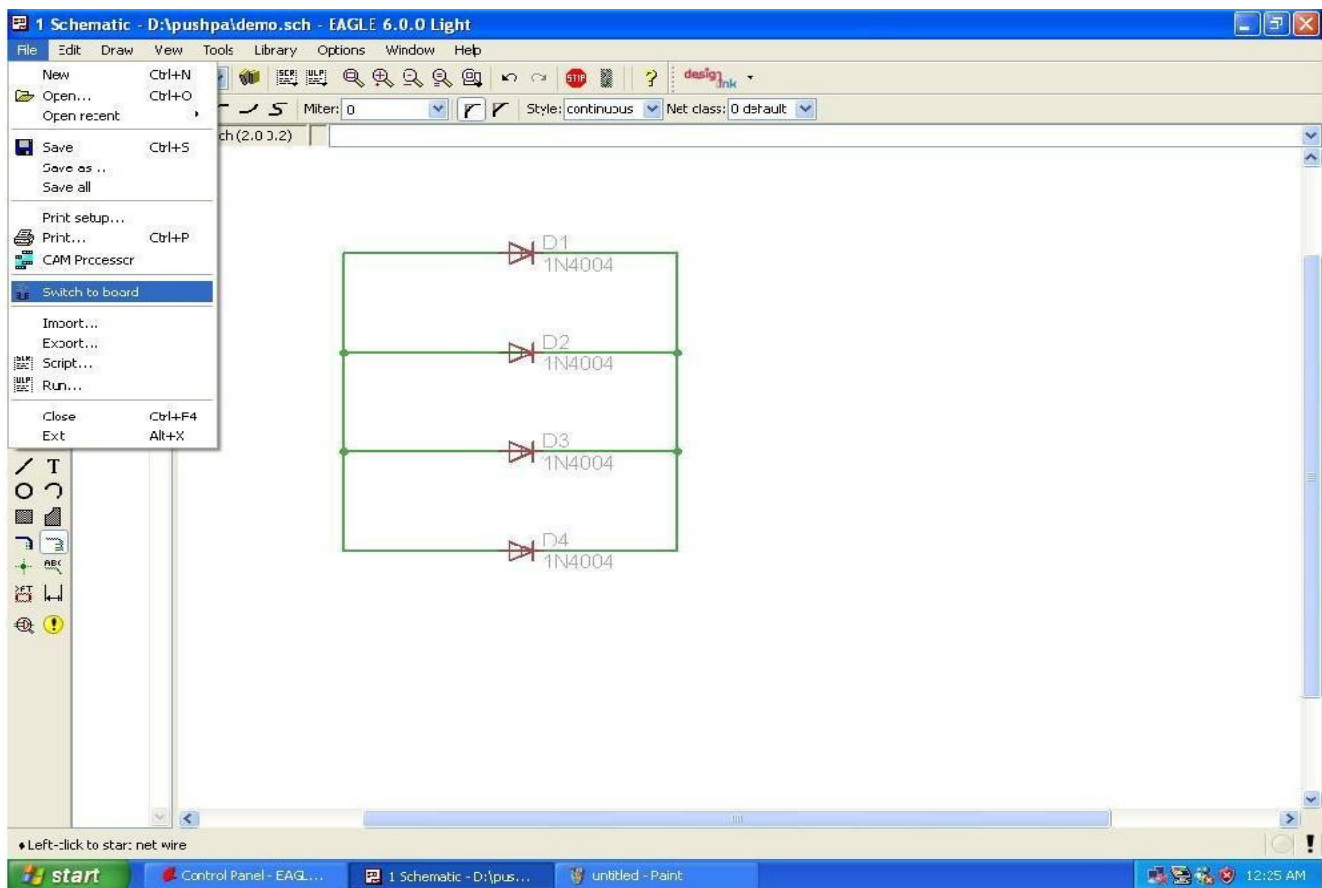

Schematic view after connection completed.

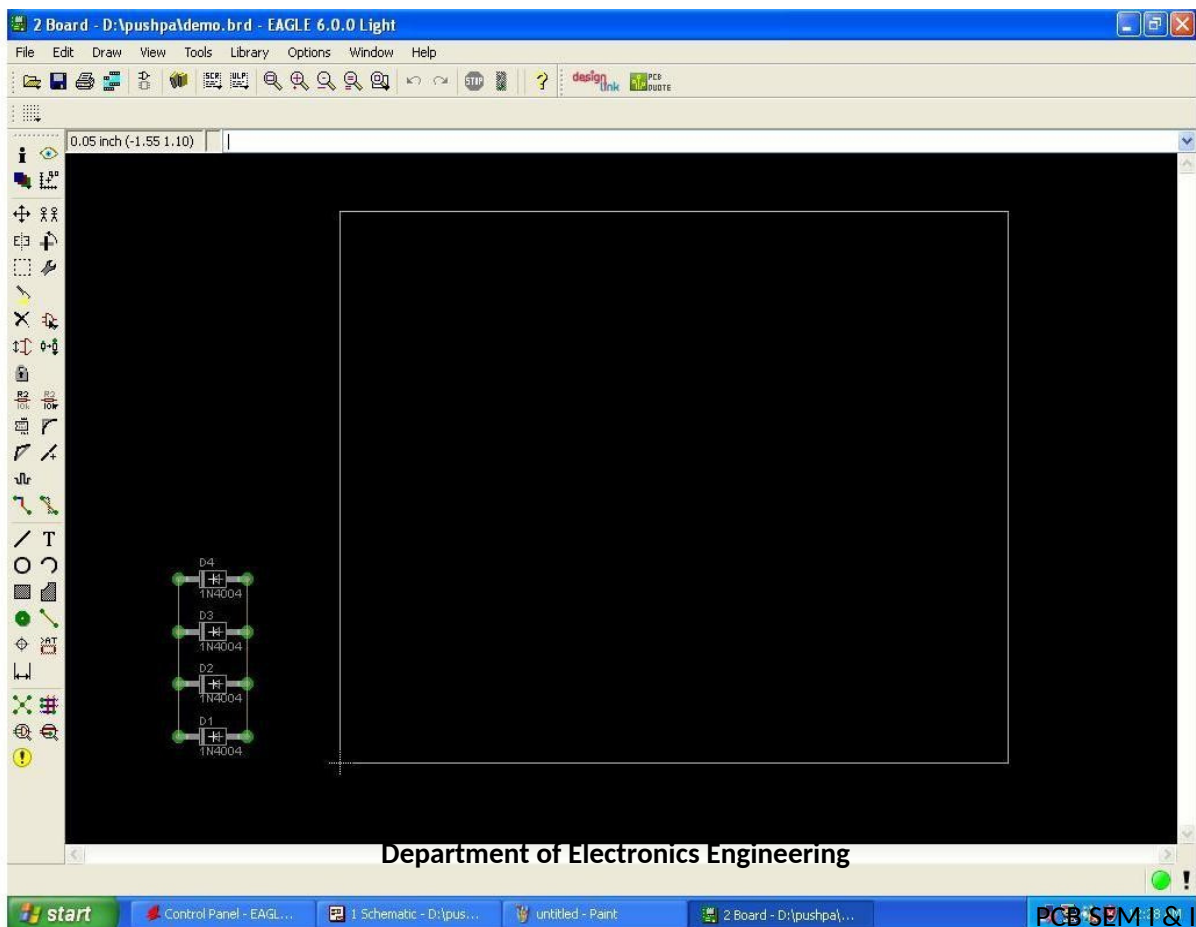

Step to convert schematic into Layout click

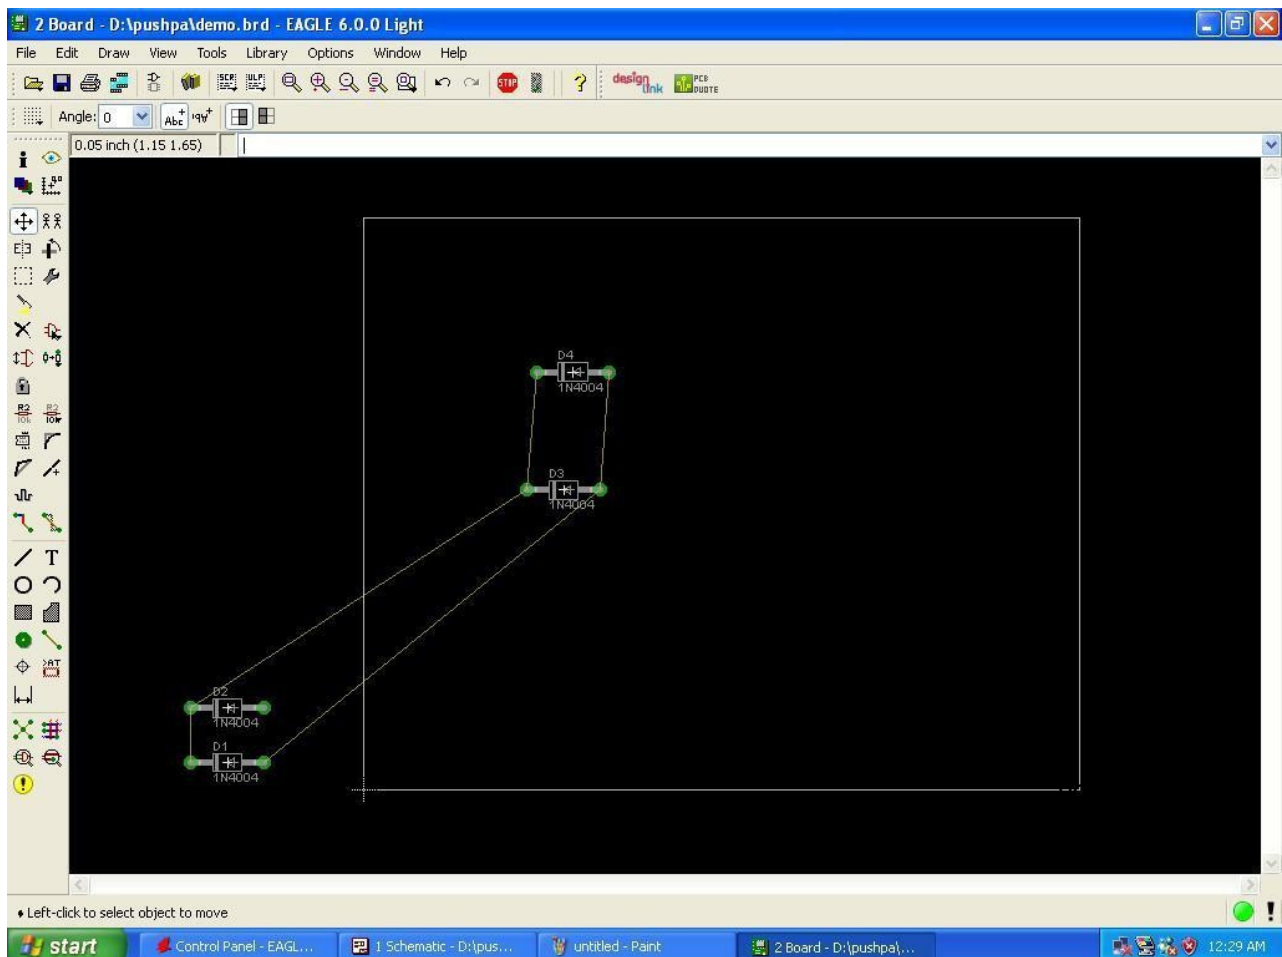

File Switch to Board

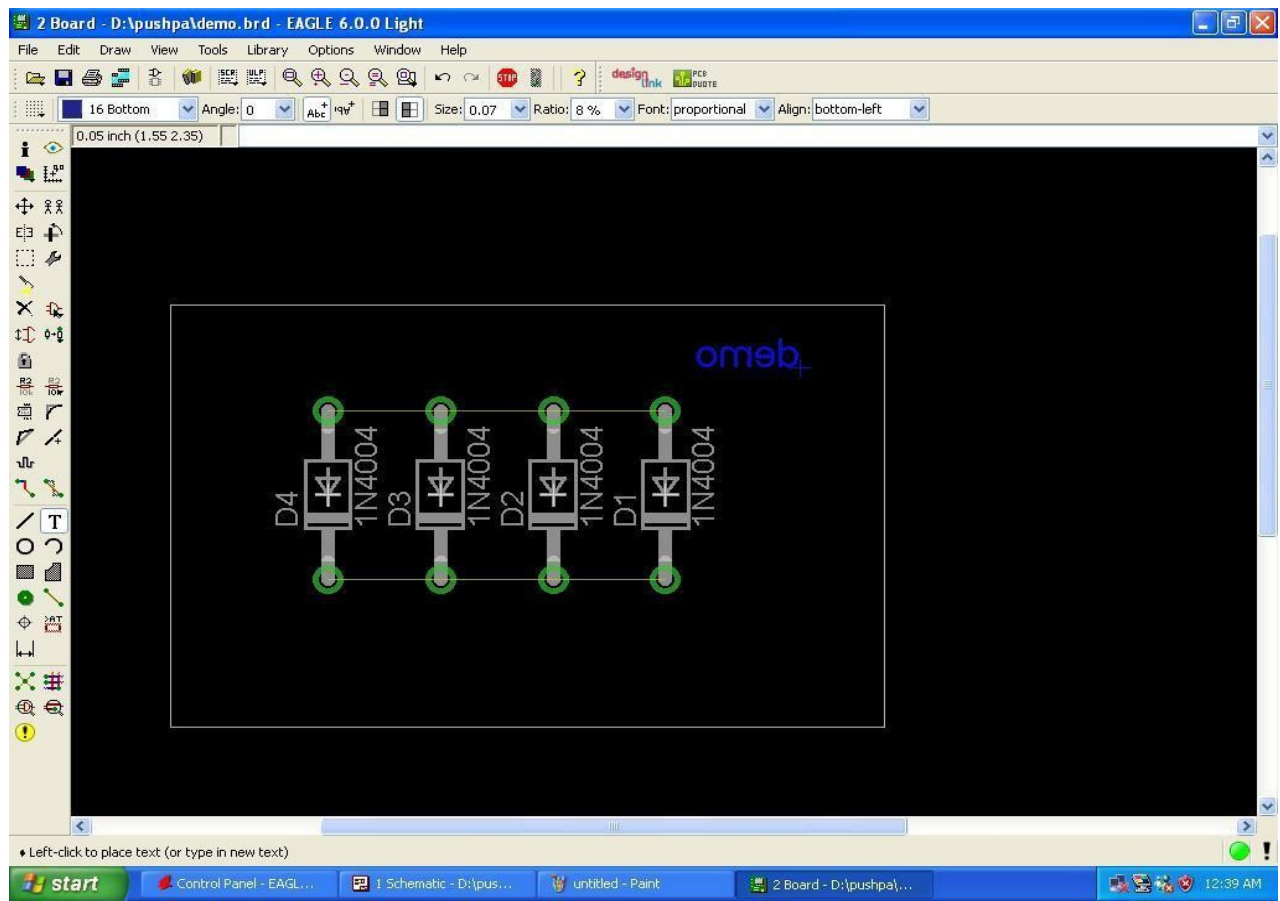

Layout window now move diode inside square area using Move icon

## Component moving Window

After Movement of Component completed Layout view.
